DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-8 and 15-22, are drawn to a method and system for automatically calibrating the frequency range of a PLL, classified in class 702, subclass 106.
- II. Claims 9-14, are drawn to a method for determining an optimal frequency range in a PLL, classified in class 375, subclass 215.

The inventions are distinct, each from the other because of the following reasons:

Inventions of each of groups I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions can each be used for their respective uses has separate utility such as determining the optimal frequency range in a PLL. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was placed to Winston Hsu on 4/21/05 to make a provisional election however no election was made.
